DETAILED ACTION

Election/Restriction

Combination/subcombination

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21 and 26-34, drawn to “battery charging system with band-gap voltage”, classified in class 320, subclass 162.
 - II. Claims 22-25, drawn to “battery charging system with an operational amplifier”, classified in class 320, subclass 152.
 - III. Claims 35-42, drawn to “battery charging system with a current source in series with load”, classified in class 320, subclass 164.
2. subcombinations are distinct from each other if they are shown to be separately usable.
In the instant case, inventions can each be used for their respective uses has separate utility such as different way of charging a battery. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Marvin Jacobs on 20 August 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Affirmation of this election must be made by applicant in replying to this Office action. Applicant is advised

Art Unit: 2838

that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)
